

Mobilewatch

Mobile Clinic Service

Urodynamics

Complete range of complex urodynamics studies, with easy to read reports and automatic leak point pressure analyses.

PVR + Uroflow

Fast & non-invasive determination of voiding ability and post-void residual urine, eliminating the need for invasive catheterization.

Pelvic Floor Retraining

EMG biofeedback & stimulation, with scripts suited to all patients. PC software option with custom templates & reports.

Ultrasound

High-quality ultrasound scans of the kidneys, bladder, testes, prostate and other vital organs, including biopsies.

Mobilewatch Software Package

Mobilewatch Software

- Integrating additional diagnostic tests into your clinical practice means providing better care for your patients and ensures that they remain healthy happy clients.
- Let Mediwatch help you expand your clinical offerings with a service to beat all services, a one-stop shop for all your Urology Diagnostic needs.
- Our online solution is designed with you, the medical professional in mind.
- This new software package allows you to add additional procedures to your practice with no initial outlay.
- Easy to use platform includes scheduling of tests, CPT codes, insurance information and reporting.
- Reports are easily accessible through your personal interface, or printed in your office.
- EMR integration is available to make the system totally paperless.

The Mediwatch Mobilewatch package brings all of these services to you whenever you want, along with the expertise to run them and provide results for interpretation and invoicing.

Example: For Urodynamics

You will need to:

- Arrange for at least 4 patients to be ready for the procedure on a given day.
- Have a procedure room available.
- Interpret the results provided.
- Bill for the procedure.

Mediwatch will

- License you software to create an online schedule of your patients.
- Arrange for an experienced clinical professional to perform the procedure.
- Supply all catheters, tubing and electrodes.
- Provide all the equipment required.
- Have comprehensive & intuitive reports as printouts and for you to download.
- Send work reports with a listing of patients tested and the CPT codes for all the tests performed each week.
